## NEEDS ASSESSMENT

Care of the trauma patient is rapidly evolving with many advances in science and technology. Optimal patient care is attained through implementation of these advances at the bedside. This course will incorporate current guidelines, evidence-based principles and innovative, thought provoking elements of trauma care throughout the continuum.

## OBJECTIVES

List examples of damage control orthopaedic treatments.

Discuss resuscitation advances and techniques, from the field through the hospital stay.

Define risks specific to rural trauma patients.

Identify challenges faced by a primary receiving facility during a mass casualty situation.

Identify the emotional and psychological needs of patients and healthcare providers involved in a disaster.

## AUDIENCE

This offering is recommended for all health care providers who interact with critically ill adult and/or pediatric patients and any professionals interested in the care of the trauma patient.

## REGISTRATION

Pre-registration is highly recommended. Walk-ins accommodated on a space available basis.

### No charge. Register by email:

Include your name, name of course, home address, employer, department, credentials, telephone number and **license number**. Email: [TraumaEducation@kumc.edu](mailto:TraumaEducation@kumc.edu)
